Subject: RE: Baxter Arlington RCRA Site - April Monthly Progress Report (Apr. 15 - May 14 Period)

Hi Georgia, Josh, *et al*,
EPA has reviewed Baxter's April Monthly Progress Report, received by email on May 15, 2019 (below). In it Baxter proposes reducing the monitoring for PAHs, and will "continue to sample for PAHs in one source area well (MW-3) and one well immediately downgradient of the site (MW-30) on an annual basis after Second Quarter 2019. If concentrations of PCPs or PAHs in remaining sampled wells increase significantly across the site, monitoring of the expanded list of wells for PAHs will resume." EPA hereby approves this request. -Jan
